Subject: Updated GW Results

Brian,

A GW sample was taken from 4012 Cossell Road on 12 1 09, VC level is @ 62.7 ppb, see attached. I have also attached sample results for 4018 W Vermont & 4042 W Vermont, 11 30 09 sample date. The well logs for all three properties is attached, well depth varies from 35 ft to 75 feet. We have been by 4012 Cossell Road several times in the last few weeks, property owner (he indicated to us he is retired) does not respond to us knocking on the door despite our belief that he is inside. I have left an ATSDR (VC) fact sheet on the front door with my business card requesting a call back. I will send out a letter today explaining EPA would like to provide free bottled water for the short term along with your contact information.
